

**Assignment No.4:- Program to solve a 0-1 Knapsack problem using dynamic programming or branch and bound strategy**

**Name:-Sameer Narendra Tikare**

**Roll No:-COBB034**

```
# A Dynamic Programming based Python
# Program for 0-1 Knapsack problem
# Returns the maximum value that can
# be put in a knapsack of capacity W
```

```
def knapSack(W, wt, val, n):
    K = [[0 for x in range(W + 1)] for x in range(n + 1)]
```

```
    # Build table K[][] in bottom up manner
```

```
    for i in range(n + 1):
        for w in range(W + 1):
            if i == 0 or w == 0:
                K[i][w] = 0
            elif wt[i-1] <= w:
                K[i][w] = max(val[i-1]
                              + K[i-1][w-wt[i-1]],
                              K[i-1][w])
            else:
                K[i][w] = K[i-1][w]
```

```
    return K[n][W]
```

```
def InputList():
```

```
    lst = []
    n = int(input("Enter number of elements : "))
```

```
    for i in range(0, n):
        ele = int(input())
        lst.append(ele)
```

```
    return lst
```

```
# Driver code
```

```
#val = [60, 100, 120]
```

```
val = InputList()
```

```
#wt = [10, 20, 30]
```

```
wt = InputList()
```

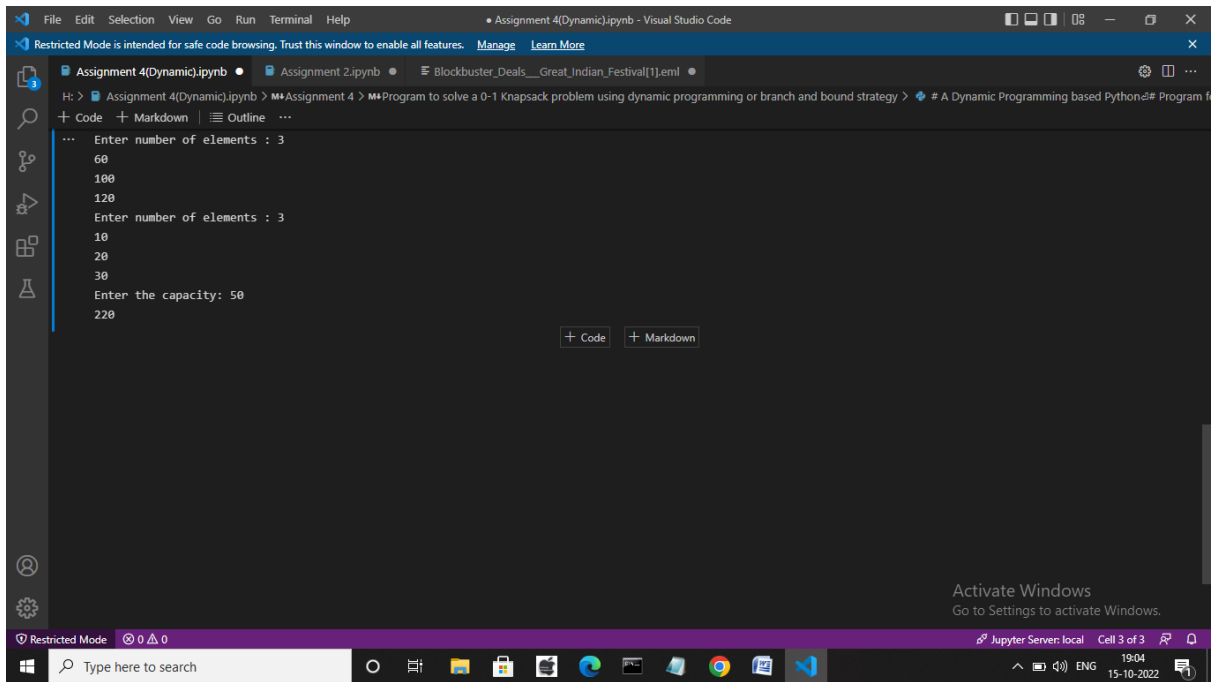

```
#W = 50
```

```
W = int(input("Enter the capacity: "))
```

```
n = len(val)
```

```
print(knapSack(W, wt, val, n))
```

## Output

The screenshot shows a Jupyter Notebook titled "Assignment 4(Dynamic).ipynb" in Visual Studio Code. The notebook is in "Restricted Mode" and contains a single cell with the following output:

```
Enter number of elements : 3
60
100
120
Enter number of elements : 3
10
20
30
Enter the capacity: 50
220
```

The output is displayed in a dark-themed interface. The top bar shows the file name and the "Restricted Mode" warning. The bottom bar shows the Windows taskbar with various application icons and the system clock indicating 19:04 on 15-10-2022.
